**ACCIONA INDUSTRIAL awards FRANCO TOSI MECCANICA with a contract for a 44MWe Steam Turbogenerator in U.K.**

Franco Tosi Meccanica has signed a contract with ACCIONA Industrial UK Limited for the supply of a 44MWe Steam Turbine Generator for the Energy from Waste Project at Kelvin Way, West Bromwich, Midlands (U.K.).

ACCIONA had been previously awarded from ENFINIUM – one of the largest U.K. developers, owners and operators of waste-to-energy facilities – the contract for the Engineering, Procurement and Construction (EPC) of the plant.

The turbogenerator will be designed to utilize approx. 170 tons of steam per hour producing 44MWe of partially renewable, baseload electricity to power the needs of more than 95,000 U.K. homes and businesses.

Feel free to contact Franco Tosi Sales Department at [marketing@francotosimeccanica.it](mailto:marketing@francotosimeccanica.it) for additional details of the Project, and for more information on our capabilities to design specific tailor-made Turbomachines for your needs.
